

Please do not implement any proposal that would lessen Indiana's Telephone Privacy law protections. We have gone from having up to 3 or 4 telemarketer calls a night to just 1 or fewer a week. It has allowed us to have uninterrupted family dinners and quality time. We feel that companies should not be able to bother us while we are in our own home. We feel that Indiana's law is very important and has had a significantly positive effect on our lives.
